Progressive Web App

Performance

Metrics			=
First Contentful Paint	0.7 s	Time to Interactive	0.7 s
Speed Index	0.7 s	Total Blocking Time	0 ms
Largest Contentful Paint	0.7 s	Cumulative Layout Shift	0

Values are estimated and may vary. The performance score is calculated directly from these metrics. See calculator.

Alleria Alleria

Opportunities — These suggestions can help your page load faster. They don't directly affect the Performance score.

Opportunity Estimated Savings

Minify JavaScript 0.16 s

Remove unused JavaScript 0.16 s

Diagnostics — More information about the performance of your application. These numbers don't <u>directly affect</u> the Performance score.

▲ Serve static assets with an efficient cache policy — 3 resources found

Avoid chaining critical requests — 3 chains found

Not applicable (1)

Passed audits (28)		~
	Avoid long main-thread tasks — 1 long task found	~
	Largest Contentful Paint element — 1 element found	~
	Keep request counts low and transfer sizes small — 6 requests • 424 KiB	~

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.

Progressive Web App

These checks validate the aspects of a Progressive Web App. Learn more.

Fast and reliable

	Page load is fast enough on mobile networks	~
	Current page does not respond with a 200 when offline	~
	start_url does not respond with a 200 when offline Timed out waiting for start_url (http://localhost:3000/) to respond.	~
	Installable	
	Uses HTTPS	~
A	Does not register a service worker that controls page and start_url	~
	Web app manifest meets the installability requirements	~
	PWA Optimized	
	Does not redirect HTTP traffic to HTTPS	~
	Configured for a custom splash screen	~
	Sets a theme color for the address bar.	~

Content is sized correctly for the viewport	~	
Has a <meta name="viewport"/> tag with width or initial-scale	_	
Contains some content when JavaScript is not available	_	
Provides a valid apple-touch-icon	_	
▲ Manifest doesn't have a maskable icon		
Additional items to manually check (3) — These checks are required by the baseline PWA Checklist but are not		
automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
